The Jumpr Prime 10400 is a compact and powerful powerbank to throw in a backpack, a briefcase, or a gym bag while on the go. This 10,400 mAh portable battery is convenient when you don't have time to connect to an outlet or get a charge from the sun. It's lightweight, and compact enough to hold in your hand or to throw in your pocket so you can take it literally anywhere. Finally, its dual outputs allows for simultaneous charging so you can keep all your electronics charged up throughout the day.
