The Jumpr Prime 7800 is the perfect accessory to throw in a backpack, a briefcase, or a gym bag while on the go. This portable battery is convenient when you don't have time to connect to an outlet or get a charge from the sun. It's lightweight, and compact enough to hold in your hand or to throw in your pocket so you can take it literally anywhere. The battery also comes with a built in flashlight to help guide the way when the lights are out.
